ARTIST REVIEW: SIENNA – “QUINTESSENCE” SINGLE

posted in EDM, Indie, Music Review, Single

Review by: Justyn Brodsky

When it comes to production value, it's all about the elements of how and why a song is effective, and the uniqueness that is carried with it. We get an innovative, punchy, knockout beat banger with Producer Sienna's single "Quintessence". A bump-and-grind go-getter track that brings a vibrant and bass-oriented chemistry to the table that puts solidification into musical innovation.

With a lot of today's creators in the world of EDM, it's imperative to showcase your versatility and composing ability in the best way possible, so you can give yourself and your audience an in-depth impression of your expression. Sienna has a very well-rounded craft with this track, and the intensity of the rotund low end combined with the anticipation from the song's buildup is what really makes this track the gem that it really is.

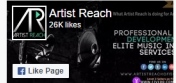

If you have a bass-thumping sound system, then "Quintessence" will likely rumble through your entire neighborhood. It's energetic, witty, clever, and has some great twists and turns as the song builds into a beautiful climax. It has a simple approach in its beginnings, and I believe it's the type of simplicity that really makes this track effective when all the other elements play out.

Sienna definitely has a brilliant ear for detail and is worth checking out in every way. She delivers the goods with this single, and you'll probably find yourself doing more research on more of her music after cranking "Quintessence" through your speakers.
