

Sienna Releases A New Track Entitled "What Matters"

March 24, 2019 | Noah Penza

Female singer-songwriter from Kyoto, Japan, has released a new track entitled *What Matters*.

The track encapsulates Sienna's own original style, blending Japanese traditional into electronica genre. She describes it as "East meets west in dreamy electronica". The track is the 7th original release since 2005 for the artist. She has released 1 EP, 1 single and 4 albums prior to *What Matters*.

The track is 6 minutes and 14 seconds in runtime. It is a down tempo and experimental journey as you embark on what the track has to deliver. The vocals fit beautifully with the track. This composition is highly recommended by us and you can listen here:
