## OUT TODAY: NEW ALBUM "MOON RITUALS 月儀式" BY THE UNIQUE SIENNÁ!

By the-further / février 9, 2020

Our artist of the day is probably the best discovery of the whole week, and more. She creates an unreal musical and artistic world: her name is **Sienná**, a Japanese expatriate in Norway, and she incarnates everything that we admire in her new album: "**Moon Rituals 月儀式**".

Experimentation and risk-taking. **Sienná's** extraordinary new album "**Moon Rituals 月儀式**" blends beautiful melodies with unexpected sounds, from the east and the west. Exceptional genre-blending music with touches of electronic, Jazz and traditional-contemporary Japanese.

While discovering her unique work, we can not help but think about creative artists that we love since always like Björk, Massive Attack in a sense, even if it is really difficult to compare **Sienná** with anybody else.

**Sienná's** world is a surprising delight. The album's single "**A hazy Moon**" took us far away, in pure and peaceful landscapes.

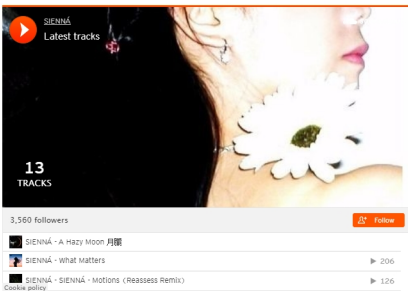

**Sienná** is a multi-talented artist who writes her lyrics, produces and brings a promising musical world.

Make sure to follow her amazing steps:
